## Build Information

**Release Date:** October 10, 2014  
**User Interface Version:** 3.0.28.10  
**Platform Version:** 2014.10.126

## User Influence

We want to hear from you! We have introduced a new user influence system for considering product enhancements. InfoBurst is now used by hundreds of sites worldwide and our users have compelling ideas for the platform. Users can propose new ideas, discuss ideas with other users and developers, and vote for their favorite ideas. The most popular ideas will be those considered for development.

Please take the time to log your ideas at our UserVoice site. You get 10 votes. If an idea you vote for is accepted for development, you get that vote back.

<http://infosol.uservoice.com>

Simply enter your email address under **Sign In** to register and share your ideas.

## New Features

### Document Processing

#### SAP BusinessObjects 4.1 SP4

Support added for SAP BusinessObjects 4.1 SP 4

#### SSRS Internal & Hidden Parameters

SSRS report Internal and Hidden parameters are now supported and will not be displayed in the burst user interface.

#### SSRS Default Values

SSRS report parameters with 'Default' values are now supported. The 'Default' value will be assigned to the parameter when the report is added to a burst. If a default value represents an underlying function (example: 'Today' = 'Current date MM/DD/YY'), 'Use Defaults' option is available in the burst UI. This option will use the default value and its underlying function.

## Publishing

### Crystal Reports - Excel 2007 Data Centric

Data centric (no formatting) XLSX format for BI 4.1 Crystal Reports (requires Java platform).

### Content Grouping - Customize Content Title

Customize the name/title of a piece of content in a grouped PDF file. Affects the PDF bookmark tree and table of contents.

## **Excel CSV - Keep Formatting**

Excel CSV option to retain report-formatted values

## **Deliveries**

### **[\$USEREMAIL] Macro**

Returns email address of requesting InfoBurst user. Can be used in email recipient field to send content to user that runs the burst or schedule.

### **[@EMBED] Macro**

Embed HTML file cataloged in InfoBurst into an email message (body or footer)

### **Empty Data Provider Email Notification**

Optional email notification of empty report data provider or false delivery condition now supports customized subject line.

### **SharePoint Document Title**

The **Title** property of a document delivered to SharePoint is now populated with the file name.

## **XDC**

### **Dashboards 4 Connectors**

Dashboards connector suite updated to version 2.0.18 to address a minor issue with loading messages when converted to HTML5 (BI Mobile). No functionality changes in this connector suite.

## **Platform**

### **SQL Server 2014**

SQL Server 2014 now supported for InfoBurst database repository.

### **System Management**

System Management user interface now supports Windows Authentication.

## **Fixed Issues**

- Issue with Excel content grouping and long tab names

- Cache Query with 20+ parameters could crash service
- Empty Data Provider would not iterate through other param combos
- PdfMerge utility was offsetting page numbers
- Burst Document Macros used as Parameters were saved with result
- Multi-variable filtering for Crystal Reports
- Multi-pass/Single-pass combination for Crystal Report
- 'Load' message not working for BI Mobile connectors

## Known Issues

- Issue with dates returned from an Excel data source. Regardless of date format defined in Excel, all dates returned a M/D/YY.

## Fix Packs

Fix packs contain various fixes for issues present in build 126.

- It is not necessary to apply a fix pack unless you require one of the fixes listed below.
- Apply a fix pack only after updating to build 126.
- **Fix packs are cumulative. No need to apply previous fix packs if the desired fix is in a later fix pack.**

## Recommendations

- Back up the InfoBurst server prior to applying the fix pack
- Test and qualify key bursts and/or XDCs before applying the fix pack in production

## Applying a Fix Pack

- Stop the InfoBurst service
- Back up the InfoBurst server
- Run the Fix Pack update
- Start the InfoBurst service

## Fix Pack 1

### Build Information

**Release Date:** October 30, 2014

**Platform Version:** 2014.10.126 FP1

### Fixed Issues

Fix Pack (FP1) for build 126 addresses the following issues:

- BI 4.1 sessions (Web Service) not closing properly
- When **When data provider is empty** option for a BI 4.1 Web document is set to **Log message in activity log** and document returns data, no content is delivered

- Error *Unable to set document Source :: Source does not support DataTable conversion* when using Excel File List as a Document Source in a burst when Excel is added to InfoBurst from **My Computer**
- Decimal rounding occurs when using XDC over JSON (affects HTML5 dashboards only)
- Error *Illegal argument (Suspicious identifier(s): [1]) (WSR 00102)* returned during multi-pass burst of a BI 4.1 WebI report (web service only)
- Cache queries intermittently fail when cache query name contains a space
- TOC links offset when using PDFMerge utility
- Error *No document has been opened* when publishing BI 4.1 WebI in Native format to XI Server (web service only)
- Load message not working for InfoBurst connectors when converted for BI Mobile (HTML5)
- *Missing Parameter* error passing a parameter via any InfoBurst connector when converted for BI Mobile (HTML5)
- *NullPointerException* error returned when attempting to catalog BI4 Crystal Reports

## Download

Fix Pack 1 (InfoBurstPlatform-Update-b126\_GR\_FP1\_r28.exe) is available for download in the **Downloads** section of the InfoSol support site (<http://support.infosol.com/Downloads>)

## Fix Pack 2

### Build Information

**Release Date:** November 20, 2014

**Platform Version:** 2014.10.126 FP2

### Fixed Issues

Fix Pack (FP2) for build 126 addresses the following issues:

- BI 4.1 Crystal Report using stored procedure returns date format error when refreshing with date parameter
- Multiple (redundant) exports when using an Excel File List with condition(s)
- nSoftware license error when adding SharePoint delivery
- Duplicate values in MultiColumn List treated as single value when used as parameter data source
- Date values added to blank cells in a date-format column when publishing Excel CSV
- OpenDoc link for delivery to BI4 server invalid
- *Could not find a base address that matches scheme* error when enabling SSL
- Float values not supported in JSON queries

## Download

Fix Pack 2 (InfoBurstPlatform-Update-b126\_GR\_FP2\_r30.exe) is available for download in the **Downloads** section of the InfoSol support site (<http://support.infosol.com/Downloads>)

## Fix Pack 3

### Build Information

**Release Date:** January 20, 2015

**Platform Version:** 2014.10.126 FP3

## Fixed Issues

Fix Pack (FP3) for build 126 addresses the following issues:

- Content Grouping by variable fails when grouping value contains a comma
- Publication of Excel 2007 format fails when delivery uses Delivery Condition
- BI4 Crystal Report published as Excel 2007 Data Centric results in file with no extension
- BI4 WebI with custom prompt values delivered in Native format contains data for default prompt values
- Connection Error #2032 when viewing an InfoBurst-connected dashboard in Internet Explorer 8 or earlier

## Download

Fix Pack 3 (InfoBurstPlatform-Update-b126\_GR\_FP3\_r32.exe) is available for download in the **Downloads** section of the InfoSol support site (<http://support.infosol.com/Downloads>)
