

# Build Information - Build 130

From InfoBurst Support Wiki

## Contents

- 1 Build Information
- 2 Server 2003 Support
- 3 New Features
  - 3.1 Document Processing
    - 3.1.1 Ignore Empty Data Source
  - 3.2 Data Macros
    - 3.2.1 Burst
      - 3.2.1.1 Document Multi-Select
      - 3.2.1.2 Document Search
  - 3.3 Publishing
    - 3.3.1 Excel Post Processing
  - 3.4 Deliveries
    - 3.4.1 RoamBI
  - 3.5 Platform
    - 3.5.1 Priority Queue
  - 3.6 XDC
  - 3.7 Connector Suite
    - 3.7.1 Database Queries
    - 3.7.2 Long Data Source Name
  - 3.8 Scheduling
    - 3.8.1 Using Macro
- 4 Known Issues
- 5 Fixed Issues
- 6 Fix Packs
  - 6.1 Recommendations
  - 6.2 Applying a Fix Pack
  - 6.3 Fix Pack 1
    - 6.3.1 Build Information
    - 6.3.2 Fixed Issues
    - 6.3.3 Download
  - 6.4 Fix Pack 2
    - 6.4.1 Build Information
    - 6.4.2 Fixed Issues
    - 6.4.3 Download
  - 6.5 Fix Pack 3
    - 6.5.1 Build Information
    - 6.5.2 Fixed Issues
    - 6.5.3 Download

## Build Information

**Release Date:** April 12, 2016  
**User Interface Version:** 3.1.30.6  
**Platform Version:** 2016.4.130

## Server 2003 Support

Microsoft ended support for Server 2003 on 7/15/2015. InfoBurst will be moving to .NET Framework 4.5 with build 131 (July 2016). Server 2003 will not support .NET Framework 4.5. Builds 1131 and later will require Server 2008 or later. If you currently use Server 2003, please consider upgrading your server environment. If you have questions about moving InfoBurst to a new server, please contact us via support.

## New Features

### Document Processing

#### Ignore Empty Data Source

Ignore an empty value from a parameter/filter data source where the empty value would otherwise result in a burst failure. Feature requires use of Document Source.

### Data Macros

2nd, 3rd, 4th, 5th day in month macros added

#### Burst

##### Document Multi-Select

Select multiple documents when adding documents to a burst

##### Document Search

Search for documents within a burst

## Publishing

### Excel Post Processing

Auto Fit Column Excel post-processing function added

## Deliveries

### RoamBI

RoamBI destination removed. Destination is no longer supported. Existing bursts using RoamBI destination will continue to function.

# Platform

## Priority Queue

New Priority Queue that operates outside of normal Platform Queues. This new queue is intended for jobs that must run, regardless of existing queues.

## XDC

## Connector Suite

Version update for Connector Suite for Dashboards 4 Connectors. Updated to address issue IBE-4088 (below).

## Database Queries

Option added to select one or more queries from a Database Connection when adding query as data source

## Long Data Source Name

XDC Panel now includes horizontal scroll bar to view long data source names

## Scheduling

### Using Macro

User interface updated to allow manual entry of any date macro or selection of date macro from the Macro Builder

## Known Issues

- Object Deletion: When in **Detail** view, an object persists after deleting that object. To work around the issue, change the detail view to any size tile view the delete the object. See User Interface #11. This issue will be addressed in Fix Pack 1 for build 130.

## Fixed Issues

The following issues are fixed in build 130:

- IBE-4116: AD user belongs to multiple synced AD groups. User is remove from one AD group. Now disabled in all groups.
- IBE-4115: WebI Native (Job Server) with data parameter(s) refreshed for wrong time
- IBE-4113: BEX LOV refresh not supported
- IBE-4103: Activity Log items out of chronological order
- IBE-4095: Burst execution error 'RTSLogID of 0' when InfoBurst license is improperly applied
- IBE-4077: Document parameters ignored when duplicate parameters exist with different case
- IBE-4078: Crystal CSV overflow not supported
- IBE-4067: 'Stop on Abort' does not apply during delivery phase
- IBE-4112: Parameter values incorrect when PDF and Native formats are combined

- IBE-4098: NULL in BusinessObjects LOV results in 'Object not set...' error on OPEN
- IBE-4109: Document properties Delivery Log information incorrect with multiple email deliveries
- IBE-4108: 'A parameter with id '0' has been found several times' error with large BusinessObjects LOV
- IBE-4107: Blank Document Name/Path in Document Properties for BI4 Crystal
- IBE-4105: No Tool tip for Priority Ticker in Schedule user interface.
- IBE-4101: Java bridge port allocation issue when Max Generation occurs
- IBE-4096: "Failed to read 'Success' XML response" BI4 WebI error when duplicate parameters exist for same data provider
- IBE-4088: REST dates for db query, cache query, and cache come through as /Date()/ values
- IBE-4092: Incomplete List of BO Users returned for XI Inbox delivery
- IBE-4085: Wrong URLs generated with GetReportParts API call
- IBE-4086: Context UID not found after Platform Migration
- IBE-4081: "Failed to read 'Success' XML response" BI4 WebI error when duplicate parameters exist for different data providers
- IBE-4074: 'Unable to get cache queries' UI issue after creating cache query
- IBE-4083: BI4 WS - Open Fails When Multi-Column LOV is Present
- IBE-4080: During file catalog filtering for items removes previously selected items
- IBE-4079: Unable to filter objects while cataloging a document when a document is checked
- IBE-4076: Insufficient permissions error when attempting to get cache queries
- IBE-4073: Delivery Template edit error when template referenced 250+ times
- IBE-4068: Excel Lookup fails With multiple parameters
- IBE-4064: Registered Printers UI is not toggling the "enable/disable" display button
- IBE-4071: Values for numeric interval parameter not passed correctly
- IBE-1850: MCList retains old column during import columns from report workflow
- IBE-1845: Optional prompts not identified in Document Properties
- IBE-1774: Native delivery allowed for document using filtering
- IBE-852: Tabbing not functional for Minute Intervals boxes

## Fix Packs

Fix packs contain various fixes for issues present in build 130.

- It is not necessary to apply a fix pack unless you require one of the fixes listed below.
- You can update directly from a previous build to the desired fix pack.

## Recommendations

- Back up the InfoBurst server prior to applying the fix pack
- Test and qualify key bursts and/or XDCs before applying the fix pack in production

## Applying a Fix Pack

- Stop the InfoBurst service
- Back up the InfoBurst server
- Run the Fix Pack update
- Start the InfoBurst service

## Fix Pack 1

### Build Information

**Release Date:** June 13, 2016  
**User Interface Version:** 3.1.30.8  
**Platform Version:** 2016.4.130 FP1

## Fixed Issues

- IBE-4123: *Error while generating parameters :: A column named 'Select a context' already belongs to this DataTable* occurs via BI4 web service when report contains multiple data providers with context
- IBE-4119: Unable to delete objects while using Detail View
- IBE-4120: Schedule objects not visible when schedule contains no burst or XDC

## Download

Fix Pack 1 is available for download in the **Downloads** section of the InfoSol support site (<http://support.infosol.com/Downloads>)

## Fix Pack 2

### Build Information

**Release Date:** August 23, 2016  
**User Interface Version:** 3.1.30.10  
**Platform Version:** 2016.4.130 FP2

## Fixed Issues

- IBE-4238: BI 4.1 DCP - Added automatic option to KILL BUSOBJ (DeskI) process that fail to quit
- IBE-4157: Schedules Report burst name incorrectly contains schedule name
- IBE-4239: Specific email message size causes burst user interface not to open
- IBE-4153: XDC Cache Query > Crosstab Options changes not saved

## Download

Fix Pack 2 is available for download in the **Downloads** section of the InfoSol support site (<http://support.infosol.com/Downloads>)

## Fix Pack 3

### Build Information

**Release Date:** September 2, 2016  
**User Interface Version:** 3.1.30.10  
**Platform Version:** 2016.4.130 FP3

## Fixed Issues

- IBE-4250 - Email not properly grouped when multiple email addresses are semi-colon delimited in data source
- IBE-4117 - Macro concatenation not supported for @fist, @last, @mid macros

## Download

Fix Pack 3 is available for download in the **Downloads** section of the InfoSol support site (<http://support.infosol.com/Downloads>)
