## Build Information

**Release Date:** June 6, 2014

**User Interface Version:** 3.0.26.11

**Platform Version:** 2014.6.125

## New Features

### Document Processing

#### BI 4.1 SP 3

Support added for SAP BusinessObjects 4.1 SP 3

## **BI 4.0 SP 9**

Support added for SAP BusinessObjects 4.0 SP 9

## **XI 3.1 SP7**

Support added for SAP BusinessObjects 3.1 SP7

### **Empty Data Provider Options**

New options available for when a report data provider contains no data.

## **Publishing**

### **Content Grouping**

#### **Grouping By Multiple Variables**

Grouping by variable has been extended to support grouping by multiple variables

Example:

- *Burst Report 1 and Report 2 for Tokyo/Japan --> Group output for Tokyo/Japan*
- *Burst Report 1 and Report 2 for Hamburg/Germany --> Group output for Hamburg/Germany*

#### **Document Exclusion**

Exclude one or more documents from content grouping

#### **Grouped PDF Page Numbers**

Add page numbers to grouped PDF files

## **Deliveries**

### **Empty Data Provider Notification**

In the event of a blank report (empty data provider), send email recipients a notification that content was not delivered because the report contains no data.

### **Failed Delivery Condition Notification**

In the event of a false delivery condition, send email recipients a notification that content was not delivered due to the failed delivery condition.

### **Email Disclaimer and Footer**

When the global Email Disclaimer is enabled and no custom footer is defined, only the disclaimer message will be displayed. If a custom footer is defined, both the footer and disclaimer messages will be displayed.

# Platform

## Local File Upload

Upload an Excel or PDF file from your local computer. Use the uploaded Excel, as you would a network Excel file, in File Lists and XDCs.

## System Management

System Management user interface provides access to various system management tools. Replaces InfoBurst Setup.

System Management is currently only supported for InfoBurst authentication. Windows authentication will be supported in a future build.

## Default Crystal DB Logon

Set a system default Crystal Reports database logon. When a DB Logon is required but not defined by the user, system default logon will be used.

To enable, set the following configurations via System Config:

- CRDBLogonUser
- CRDBLogonPassword

## System Alerts Opt Out

Starting in build 124, system alert emails are sent (by default) to all ADMIN users and InfoSol in the event of either repository connectivity failure or server license issue.

To opt out (applies to all users), set the following system configuration to **False** via System Management:

- SendSystemAlerts

To opt out of sending alerts to InfoSol, set the following system configuration to **False** via System Management:

- AlertInfoSol

## Fixed Issues

- FIRSTDAYINMONTH macro returned wrong date
- Excel Date formatting was not preserved (SF bug)
- Sorting Documents in a Burst could result in incorrect order
- Demo extension license used incorrect date
- Error when generating parameters for a Burst – Column already belongs
- Error when generating parameters for a Burst – Column does not belong
- Issue with Burst runtime if MCL/Qry used with extra columns

## Known Issues

- XI 3.1 SP6/SP7 PDF publication error (workaround)
