Component	BI-DEV-WEB (Platform Web Services)		

Please find the original document at **https://launchpad.support.sap.com/#/notes/ 3012378**

Symptom

File not uploaded to Folder using Restful web service SDK using the following query:

POST http://<base URL>/infostore/folder/<folder id>/file

Reason and Prerequisites

Environment:

SAP BusinessObjects Business Intelligence Platform 4.3 SP1

Steps to Reproduce:

1. Generate logon token with POST http://<base URL>/logon/long.
2. Take the id of the target folder on which the upload will occur from CMC.
3. Test uploading a file (formats: Web Intelligence, PDF, text, word) to the folder with Restful API:

POST http://<base URL>/infostore/folder/<folder id>/file

Header: <logon Token>

Body: In body, select the radio button "form data" and enter any name in column "Key" then select the type "File" and click the button "Select Files".

4. Notice that we get a response as expected but the file does not get uploaded.

This workflow is tested with POSTMAN Restful Client.

Solution

This issue is fixed in the patches listed in the "Support Packages & Patches" section below.

The "Support Packages & Patches" section will be populated with the relevant patch levels once they are released.

For Business Intelligence Platform maintenance schedule and strategy see the Knowledge Base Article 2144559 in References section.
